## REMOVE PAPER: DRIVE PRODUCTIVITY AND COMPLIANCE

With Digital Care Management from psMOBILE you can remove inefficient paper processes, provide real-time visibility and ensure staff in the field are compliant.

psMOBILE can quickly deliver all your paper forms and workflow to a mobile app or the web portal - ensuring immediate ROI by driving productivity and reducing admin. Care plans, logs, assessments, etc. can all be digitalised.

Staff in the field have access to the right information at the right time - on smartphones or tablets. The app also works offline so your people can work when the signal is patchy.

Data capture in the field, including photo or signature, is simple and provides managers in the office with real-time reporting making it easy to identify and resolve issues.

psMOBILE is a software-as-a-service. All you need is access to the internet and to download the app. Data security and business continuity is paramount to us. We apply the latest security standards and are ISO27001 certified.

### Key benefits

- **Save £2,500 to £5,000 per nurse or care worker**

With our solution organisations typically achieve productivity savings for field staff of 10 to 20%. In addition there are significant back-office savings.

- **Improve compliance with care plans & pathways**

It is hard to monitor and enforce consistent care delivery using paper. psMOBILE will help your staff complete the right activity at the right time.

- **Deliver real-time visibility and better reporting**

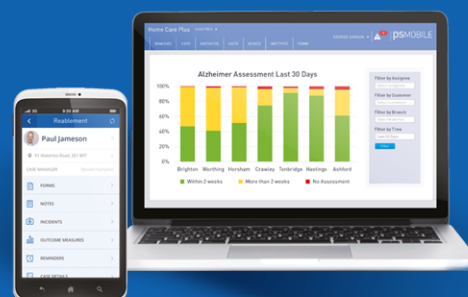

You get what you measure! With psMOBILE you can see in real-time what is happening. Alerts will notify you if service delivery is not going to plan.

## 1. DATA & FORMS

## 2. WORKFLOW RULES

## 3. ROLE-BASED ACCESS

## 4. LAUNCH!

# REMOVE PAPER: DRIVE PRODUCTIVITY AND COMPLIANCE

It is all about your services and your processes. In four simple steps you can be up and running.

- 1. Define data and forms:** Use intuitive form builder to quickly configure forms and data relevant to your services. Options include capture of signature, NFC, voice recording, photo, barcodes, etc.
- 2. Set workflow rules:** Automate processes and reminders to reduce manual intervention and set alerts to detect issues and ensure appropriate escalation.
- 3. Add role-based access:** Ensure that the right people see the right information. Stakeholder portal available to commissioners and family.
- 4. Launch:** Set up users and register devices (for security purposes) and you are done!

psMOBILE is designed to integrate and has well-documented APIs and a number of plug-ins for finance, scheduling and CRM systems.

### Key features

- 100% configurable
  - Data
  - Workflow
  - Reporting
- Apps for iOS and Android
- Offline capability
- Stakeholder portal
- Task/visit management
- Document management
- In-field printing
- Map, GPS-tracking, NFC, bar-codes, signatures, photo, etc
