

Circle - Case Study

Client overview

Circle's mission as an employee-co-owned-partnership is to run great hospitals and services dedicated to the patients. It was recently appointed by the Bedfordshire Clinical Commissioning Group as prime contractor for its large, integrated musculo-skeletal service valued at ca £120 million over five years. The CCG selected Circle to consolidate 20 separate contracts into a single service to deliver better health outcomes.

Problem

- As the prime-contractor for the large MSK contract, Circle needed to ensure the visibility of the sub-contractors' performance
- Circle needed to capture health outcomes both in the community and at home
- Circle wanted to ensure the application of consistent clinical protocols

Solution

- Roll-out of psMOBILE to clinical staff, including physiotherapists in the field
- Easy integration between psMOBILE and Circle's existing systems

Benefits

- Real-time tracking of outcomes and adherence to clinical protocols
- Cost-effective and user-friendly tablets - good for both the patient and the clinician
- Rapid deployment, less than 5 weeks
